

Want to double transmission signals and /or reduce costs by up to 50%?

Introducing [DualPath](#) - Multiplex video and associated audio signals on a single Baseband SDI, Fiber, or MPEG pipe.

This new feature is available (along with PiP-Efx) under the Multi Image License and can be installed on the BrightEye [NXT450](#), [NXT445](#), [NXT430-X](#), or the [NXT410-H](#), even in the field!

We would love to discuss applications with you and learn about your great ideas for using this option!

In the meantime you can watch this short video of a field test from South Korea to our factory in Nevada City, CA and back!

*** Other News - New Products**

- [Brighteye NXT 445 Streaming Encoder](#) - Start with Encoding at a much lower cost, Add Features as Needed

- [3 HDCP Products](#) - Starting from any input, get the SDI signals you need
